Summary

Computer Science graduate with hands-on experience designing and building backend systems in Python (Django, FastAPI). Comfortable working across the stack from database schema design to API architecture, with a solid foundation in system design and DevOps tooling.

Driven by a strong interest in AI/ML and Data Science, with practical experience fine-tuning models, building NLP applications, and developing data pipelines through academic research and hands-on projects.

Experience

Junior Python Developer, Dream71 Bangladesh Ltd.

Dec 2025 – Present

- Developed server-side logic in Python for production web-based software, following agile methodologies and team coding standards.
- Dockerized applications and deployed updates to the staging server, configuring and maintaining containerized environments for testing and iterative development.
- Collaborated with cross-functional team members to translate project requirements into functional technical solutions and consistently met project deadlines.

Key Projects

Renewable Lesotho RBF Platform

Python, Django, PostgreSQL, Celery, Docker

- Contributed backend features to a Results-Based Financing platform supporting renewable-energy vendors in Lesotho.
- Built the vendor registration and authentication module with OTP verification, role-based access control, and auto-generated vendor IDs.
- Designed a Celery-based notification engine for tender updates and a PDF/Excel export pipeline (Puppeteer, openpyxl) for dashboard reporting.

Question-Pair Similarity Classification

Python, TensorFlow, GloVe, NLP

- Engineered a Siamese BiLSTM with interaction features and frozen GloVe embeddings to identify semantically similar question pairs, achieving **0.9275 AUC** and **91.6% recall**.

AI-Powered Educational Content Assistant

Python, Hugging Face, Groq API, LangChain, Streamlit, OCR

- Built a full-stack AI application using a RAG system with re-ranking for improved retrieval, a conversational Q&A bot, and an automated quiz-assessment system with instant evaluation.

Education

North South University, B.Sc. in Computer Science and Engineering

Graduated Dec 2024

Specialized in Artificial Intelligence Trail

- **Coursework:** Data Structures & Algorithms, Software Engineering, Database Management System, Artificial Intelligence, Machine Learning

Skills

- **Backend & Frameworks:** Django, FastAPI, Streamlit, RESTful APIs
- **Databases & Infra:** PostgreSQL, MySQL, Docker, GitHub
- **Programming Languages:** Python, Java, C/C++ , SQL
- **Core CS:** Data Structures & Algorithms, OOP, System Architecture
- **AI/ML (secondary):** PyTorch, TensorFlow, Scikit-learn, HuggingFace, LangChain
